Comment is left blank
When uploading, use the following transfer mode...Use the Default mode
When downloading, use the following transfer mode...Use the Default mode

Click on OK button to exit and click Save to establish your New FTP Profile. Then, right click your newly created profile and click Rename if you wish to name your profile something familiar to you (like Hummingbird FTP). Next, right click on your new profile and click Create Shortcut to place an icon on your Desktop (for ease of use).

To use your new Hummingbird FTP client...

From your Desktop, double click your new icon to launch your Hummingbird FTP client.

This should connect you to the Division of Finance FTP server and drop you into the appropriate folder.
You can then drag the files you wish to FTP into the right hand window. A “Hummingbird FTP File Transfer” window will appear.

Wait until download is completed...with proper messages...to assure transfer is complete. Then click the Done button.
